Thanks to Nordic Council of Ministers

• To take the initiative to this seminar: Fight against the Cimate change.

We all know that action is needed.

• We, elderly people, have to **do** our best.

Føroyar - the Faroe Islands

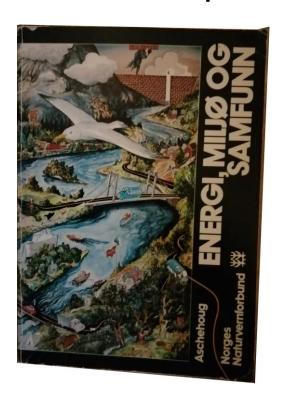

I'am representing, **FNU**, the Faroese Nature- and Environment protection organisation.

- My name is Ólavur Poulsen,
- Studying in Iceland 76-79.
- Inspired by Iceland, and Norway, in the seventies, on environment and energy – later specific on Micro Hydro Power.
- Greta Thunberg and my grandchildren are, let me say, inspiring.

- The FNU was founded in 1978.
- FNU has been quite active in periodes.
- Now is the climate change and our very high emmision and our slow green energy transition, a big issue for FNU.
- FNU had Fridays for Future

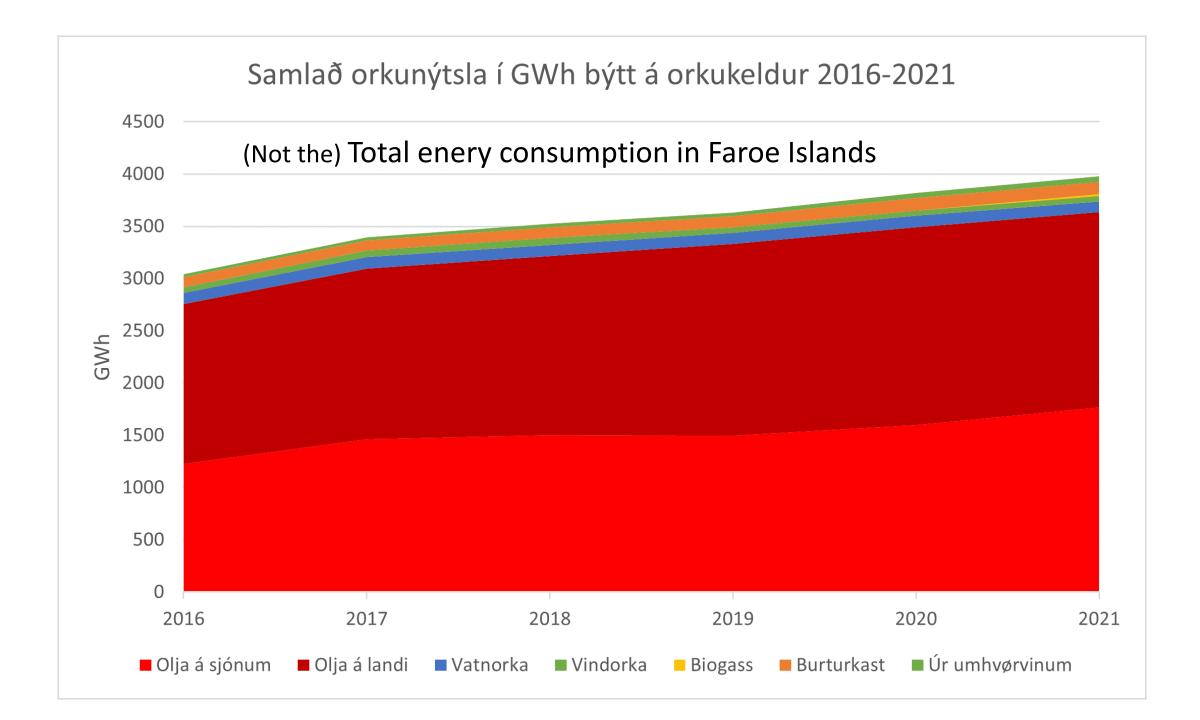

Inspiration from Iceland and Norway and Greta

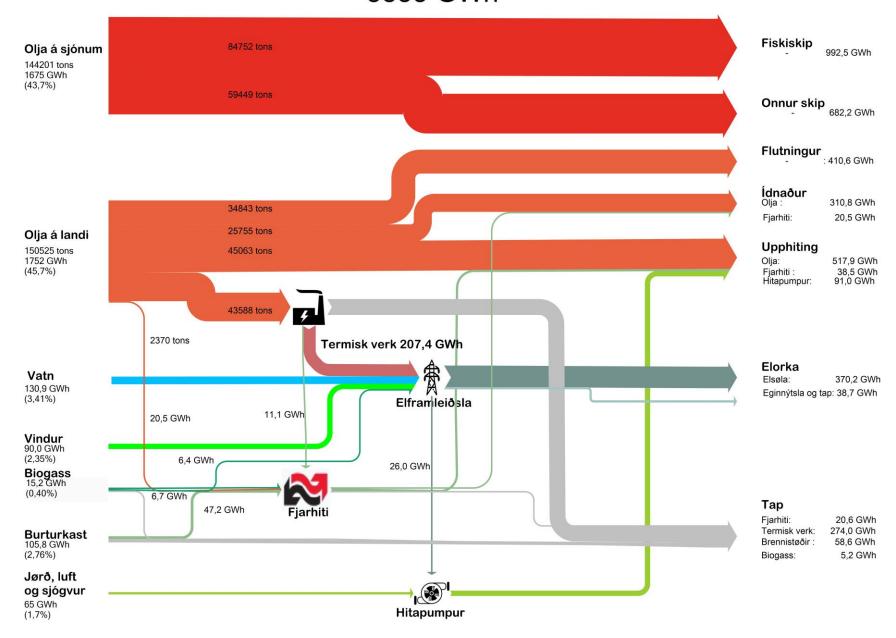

Orkurenslið í Føroyum 2022 3833 GWh

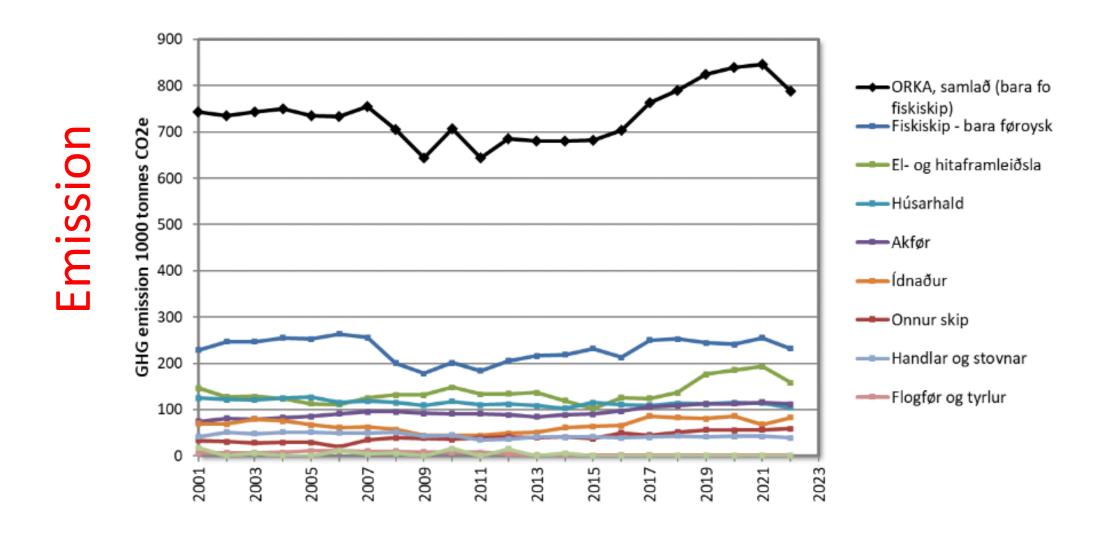

Friday for Future

Climate Strike

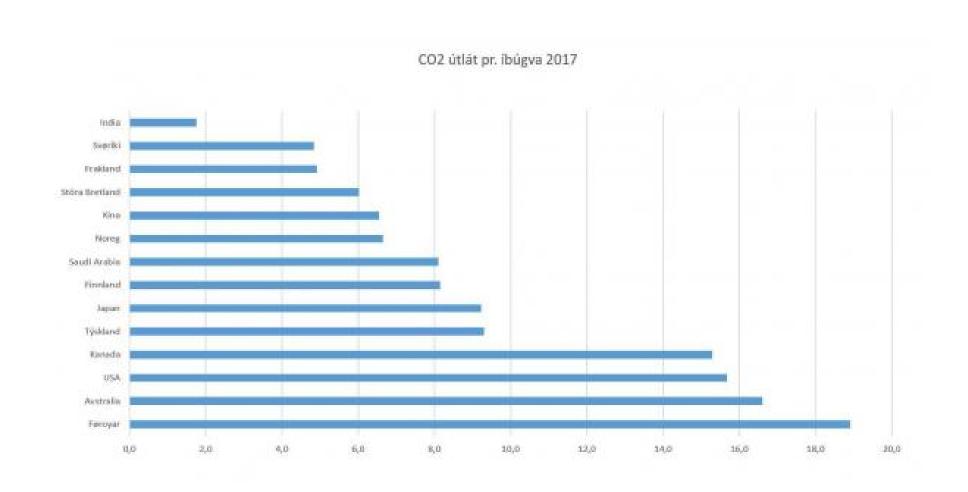

In Tórshavn, Faroe Islands

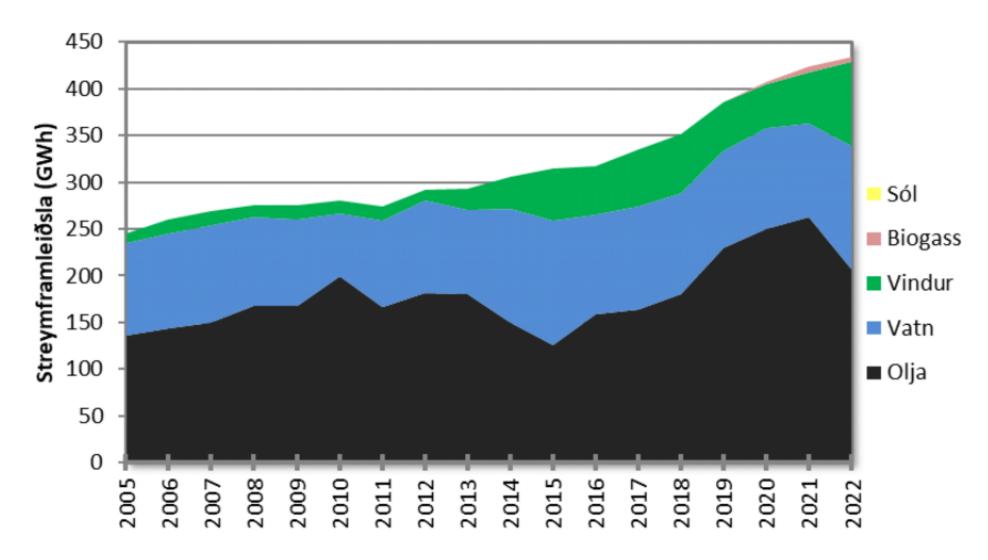

Mynd 10 Gongdin í útláti av vakstrarhúsgassi hjá brúkarabólkum, sum brenna olju, tíðarskeiðið 2001-2022, í tonsum av CO₂ eindum. Útlendsk fiskiskip eru ikki íroknað.

Emission per capita - Faroe Islands on bottom line.

Mynd 13 Nøgd Elframleiðsla hjá elfelagnum SEV, 2005-2022, sett upp eftir slag av orku (olja, vatn, vindur, biogass og sól), í mió. av kilowatt-tímum.

What can I do?

- Reduce comsumption.
- Change to green(er) solutions.
- Get <u>informed</u>.
- Participate/be involved.

- Support green solutions.
- Don't support grey/black good.
 and companies.
- Choose politicians.

Reduce our consumption – (where/when possible)

- Reduce our consumption (where/when possible)
- Use our 'goods' a little longer (where and when possible)

- Reduce our consumption (where/when possible)
- Use our 'goods' a little longer (where and when possible)
- Increase our knowledge on what we can do against climate change.

- Reduce our consumption (where/when possible)
- Use our 'goods' a little longer (where and when possible)
- Increase our knowledge on what we can do against climate change.
- Protest before wrong decisions are taken by authorities.

- Inform about and ask about 'wrong'/'strange' things we see.
- Participate in organisation(s) fighting against climate change.
- Vote for politicians really fighting against climate change.

We do have:

- Good information available.
- People and equipment to give us the information needed.
- It is up to us, to ask for more information.
- It is up to us, to inform and recommend.

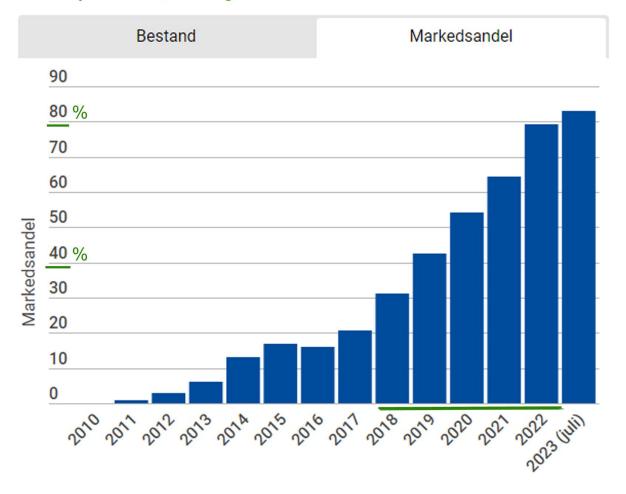

It did work!

One good exemple, what individuals did, and can do:

In Norway, the change from fossil cars to electrical cars happend fast.

Elbilbestand og markedsandel

In 5 years time, norwegian went from 40% to 80% electrical cars.

We can all make a difference.

Thank you!
